Industrial and Commercial Vibrator Motor

INDUSTRY VIBRATION MOTOR

Vibration motor is the part of machine, is the source of vibrating, and is the heart of force. When the heart has some problem, sometime is just not comfortable, but sometime will cause big trouble. Our mother company is a professional motor production line test platform provider and has more than 40 years industrial motors repair experiences. We guarantee our motor quality as well as reliability. Not only the motor design but also the material, we follow the high-level manufacture requirements to produce the "heart of force". We believe better motor source will provide better vibration force." -

CEO Mr. Wang

About Us

CHUAN SHENG ELECTRIC CO., LTD. was established in 2009 and located in Great Taichung Industry Area, Taiwan, where has convenient transportation access. We are a professional manufacturer, supplier and exporter in motor related area. Our more than 40 years experienced R&D team with capable manufacture produce high quality and cost-effective motor with CE certification as well as customize vibration motor.

Product Description

- ✓ High-performance motor-driven vibrating generator
- ✓ Multi-model lineup meets the varied needs of customers
- ✓ Standardized screw size and location for vibrated object
- ✓ Solid housing (frame and base) design for long-life operation
- ✓ Easy maintenance & high reliability

Product Features and Options

- Amplitude adjustment available
- Frequency (50/60) and Power input (110V/220V/380V/440V) selection by ordered
- Dust tight construction and splash-proof design
- Long life bearings and strengthen armature shaft
- Casting housing and enhancement screw base for strong protection
- Aluminum extrusion one piece formed housing for light-weight model (A-204, A-209, A-212, A-218, B-404, B-409, B-412)

APPLICATIONS

- ✧ Preventing clotting
- ✧ Feeder
- ✧ Vibrating sifters
- ✧ Cooling conveyors
- ✧ Material conveyors
- ✧ Mold release machines
- ✧ Vibration filters

Vibrating Motor Structure

Adjustable weights are attached at both sides and the ends of the shaft. The fixed weight and one adjustable weight are varied. To adjust the vibrating force of CHUAN SHENG Vibrators is simple and easy

Mechanical vibration applications

2 Pole

- Preventing coagulation in materials storage bins and feeder conveyance pipes used by manufacturers.
- Deal with powder and other tiny granular material in containers to load maximize capacity.
- Dislodging dust and partialities into collectors to control air pollution.
- Non-destructive vibration testing machines used in the computer and electronics industries.
- Vibrating topple over concrete forms.
- De-bubbling epoxy resin products such as PCBs. etc.

4 Pole

- ✧ Preventing pipe clogging on small size materials storage tanks.
- ✧ Deal with powder and other tiny granular material in containers.
- ✧ Dual motor resonance-type bilge machines.
- ✧ Materials conveyance and sandblasters in casting plants.
- ✧ Vibrating liquid filtration machines for sludge.
- ✧ Vibration-type electrostatic filters.
- ✧ PVC granule sifting machines have a processing capacity.
- ✧ Medium to small size conveyor and sifting machines.

6 Pole

- ✧ Preventing pipe clogging on medium and small size materials storage tanks.
- ✧ Vertical vibrating coolers and conveyors for grainy materials.
- ✧ Water or air type vibrating coolers.
- ✧ Mold release machines, recirculating sandblasters, and cooling sifters in casting plants.
- ✧ Vibrating sifters for raw material such as food or chemical (plastic, PCX granules).
- ✧ Conveyor sifter machines used in mineral extraction plants and mines.
- ✧ Medium distance conveyors and sifting machines.

8 Pole (Customize)

- ✧ Large scale packing conveyor machines.
- ✧ Vibrating sifters and vertical coolers for wet chemical ingredients.
- ✧ Heated glass wastewater cooling conveyors.
- ✧ Food and chemical raw materials dehydrating and cooling conveyors.
- ✧ Food cleaning, drying and sifting machines.
- ✧ Earthquake simulation machines (power adjustable).
- ✧ Long-distance material conveyors (six meters or less).
- ✧ Low-speed, long-distance conveyors (utilized for electroplating, casting, etc.)
- ✧ Vibration testing machines for large items
